Subject Index

Action spectrum
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275
Angelicin
molecular mechanics and dynamics of DNA–furocoumarin complexes: effect of the aromatization of the pyrone ring on the intercalation geometry, 207
Animal tumors
synthesis and *in vivo* activity of some porphyrindione derivatives with potential in photodynamic therapy, 133
Anticancer porphyrins
cellular uptake and photosensitizing properties of anticancer porphyrins in cell membranes and low and high density lipoproteins, 61
Aspartyl chlorin e6,
chlorins as photosensitizers in biology and medicine, 259
Astasia fritschii
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275

Bacillus cereus
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
Bacteriochlorins
porphyrin sensitizers in tumour phototherapy. Novel sensitizers of the chlorin and bacteriochlorin class with amphiphilic properties, 29
synthesis and *in vivo* activity of some porphyrindione derivatives with potential in photodynamic therapy, 133
Basal cell carcinoma
photodynamic therapy with endogenous protoporphyrin
IX: basic principles and present clinical experience, 143
Bladder tumors
clinical experience with the integral photodynamic therapy of bladder carcinoma, 183
synthesis and *in vivo* activity of some porphyrindione derivatives with potential in photodynamic therapy, 133
Blue light
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325
Bonellin
chlorins as photosensitizers in biology and medicine, 259

Cancer
biological activities of phthalocyanines. XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
photodynamic therapy in the treatment of malignant tumours: an analysis of 540 cases, 149
Cancer localization
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
Carotene
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325
Carotenoids
the photophysics and photochemistry of the carotenoids, 359
Catheterization
XeCl excimer laser coronary angioplasty: a convergence of favourable factors, 249
Chemopreventative treatment
the photophysics and photochemistry of the carotenoids, 359
Chlorins
chlorins as photosensitizers in biology and medicine, 259
porphyrin sensitizers in tumour phototherapy. Novel sensitizers of the chlorin and bacteriochlorin class with amphiphilic properties, 29

Elsevier Sequoia/Printed in The Netherlands

Chlorophyll fluorescence
mercury-induced alterations of chlorophyll *a* fluorescence kinetics in cyanobacteria: multiple effects of mercury on electron transport, 373
Colon cancers
photodynamic therapy in lung and gastrointestinal cancers, 175
Conjugated chlorins
chlorins as photosensitizers in biology and medicine, 259
Coronary angioplasty
XeCl excimer laser coronary angioplasty: a convergence of favourable factors, 249
Cyanobacteria
mercury-induced alterations of chlorophyll *a* fluorescence kinetics in cyanobacteria: multiple effects of mercury on electron transport, 373

Deuteroporphyrin
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
Dication
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
DNA
molecular mechanics and dynamics of DNA–furocoumarin complexes; effect of the aromatization of the pyrone ring on the intercalation geometry, 207
DNA strand breakage
induction of DNA strand breaks and DNA–protein cross-links in normal human skin fibroblasts following exposure to 254 nm UV radiation, 395
DNA–protein cross-linking
induction of DNA strand breaks and DNA–protein cross-links in normal human skin fibroblasts following exposure to 254 nm UV radiation, 395
Drug accumulation
uptake and distribtion of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
Dye laser
use of photodynamic therapy in the treatment of vocal cord carcinoma, 291

Electron paramagnetic resonance
comparison of the photosensitizing efficiencies of haematoporphyrin (HP) and its derivative (HPD) with that of free-base tetrasulphophthalocyanine (TSPC-H_2) in homogeneous and microheterogeneous media, 49
Electron transport
mercury-induced alterations of chlorophyll *a* fluorescence kinetics in cyanobacteria: multiple effects of mercury on electron transport, 373
Endocytotic-process modulation
uptake and distribution of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
Endoscopy
endoscopy photodynamic therapy with haematoporphyrin derivative in gastroenterology, 157
Energy minimization
molecular mechanics and dynamics of DNA–furocoumarin complexes: effect of the aromatization of the pyrone ring on the intercalation geometry,207
Energy transfer
the presence of long-wavelength chlorophyll *a* spectral forms in the light-harvesting chlorphyll *a/b* protein complex II, 381
Euglenoids
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275
Euglenophyta
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275
Evolution photokinesis
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275
Excimer dye laser
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
XeCl excimer laser coronary angioplasty: a convergence of favourable factors, 249

Fluorescence
in vitro and *in vivo* fluorescence monitoring of photo-sensitizers, 103
factors influencing the distribution pattern of porphyrins in cell membranes, 69
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
sites of protosensitization by protoporphyrin and tin protoporphyrin in leukemia L1210 cells, 87
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111
Furocoumarins
photoreactions of furocoumarins with biomolecules, 197
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221

Gallium
biological activities of phthalocyanines XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
Gastrointestinal cancer
endoscopic photodynamic therapy with haematoporphyrin derivative in gastroenterology, 157
Gel chromatography
on the nature of chemical bonds in haematoporphyrin derivative, 337
Gene expression
specific mRNAs accumulate in long-wavelength UV-irradiated mouse epidermis, 431

Haematoporphyrin
oesophageal cancer treated by photodynamic therapy alone or followed by radiation therapy, 167
photodynamic therapy in lung and gastrointestinal cancers, 175
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
Haematoporphyrin derivative
comparison of the photosensitizing efficiencies of haematoporphyrin (HP) and its derivative (HPD) with that of free-base tetrasulphophthalocyanine (TSPC-H_2) in homogeneous and microheterogeneous media, 49
endoscopic photodynamic therapy with haematoporphyrin derivative in gastroenterology, 157
oesophageal cancer treated by photodynamic therapy alone or followed by radiation therapy, 167
on the nature of chemical bonds in haematoporphyrin derivative, 337
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
photodynamic therapy in the treatment of malignant tumours: an analysis of 540 cases, 149
studies on the photodynamic effect of haematoporphyrin derivative, 297
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
the composition of Photofrin II, 13
time-gated fluorescence spectroscopy of porphyrin derivatives incorporated into cells, 39
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111
uptake and distribution of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
use of photodynamic therapy in the treatment of vocal cord carcinoma, 291
Heavy metal inhibition
mercury-induced alterations of chlorophyll *a* fluorescence kinetics in cyanobacteria: multiple effects of mercury on electron transport, 373
Hemin
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
High density lipoprotein (HDL)
cellular uptake and photosensitizing properties of anticancer prophyrins in cell membranes and low and high density lipoproteins, 61
HpD analogue
on the nature of chemical bonds in haematoporphyrin derivative, 337

Human skin cells
induction of DNA strand breaks and DNA–protein cross-links in normal human skin fibroblasts following exposure to 254 nm UV radiation, 395
Hydrogen peroxide
patterns of protein synthesis in a growth delay mutant (nuv) of *Escherichia coli* after treatment by near-UV radiation or hydrogen peroxide, 283

Imaging
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111

Laser
photodynamic therapy in lung and gastrointestinal cancers, 175
photodynamic therapy in the treatment of malignant tumours: an analysis of 540 cases, 149
Laser angioplasty
XeCl excimer laser coronary angioplasty: a convergence of favourable factors, 249
Light-harvesting chlorphyll *a*
the presence of long-wavelength chlorophyll *a* spectral forms in the light-harvesting chlorphyll *a/b* protein complex II, 381
Linked chlorin–porphyrins
chlorins as photosensitizers in biology and medicine, 259
Liposomes
factors influencing the distribution pattern of porphyrins in cell membranes, 69
Localization in tumors
physical chemistry of porphyrins and their interactions with membranes: the importance of pH, 79
Low-density lipoprotein
cellular uptake and photosensitizing properties of anticancer porphyrins in cell membranes and low and high density lipoproteins, 61
uptake and distribution of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
Lung cancer
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
photodynamic therapy in lung and gastrointestinal cancers, 175

Malignant tumours
photodynamic therapy in the treatment of malignant tumours: an analysis of 540 cases, 149
Mammalian cells
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221
Mechanism
physical chemistry of porphyrins and their interactions with membranes: the importance of pH, 79
Membrane
cellular uptake and photosensitizing properties of anticancer porphyrins in cell membranes and low and high density lipoproteins, 61
factors influencing the distribution pattern of porphyrins in cell membranes, 69
Membrane models
physical chemistry of porphyrins and their interactions with membranes: the importance of pH, 79
8-Methoxypsoralen
photocarcinogenicity of psoralens used in PUVA treatment: present status in mouse and man, 237
Microspectrofluorometry
uptake and distribution of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
Model building
molecular mechanics and dynamics of DNA–furocoumarin complexes: effect of the aromatization of the pyrone ring on the intercalation geometry, 207
Molecular dynamics
molecular mechanics and dynamics of DNA–furocoumarin complexes: effect of the aromatization of the pyrone ring on the intercalation geometry, 207
Mouse adenocarcinoma
studies on the photodynamic effect of haematoporphyrin derivative, 297
Mutagenicity
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221

Near-UV radiation
patterns of protein synthesis in a growth delay mutant (nuv) of *Escherichia coli* after treatment by near-UV radiation or hydrogen peroxide, 283

Oesophageal cancers
photodynamic therapy in lung and gastrointestinal cancers, 175
Oligomers
the composition of Photofrin II, 13
Oncogenes
specific mRNAs accumulate in long-wavelength UV-irradiated mouse epidermis, 431

pH
physical chemistry of porphyrins and their interactions with membranes: the importance of pH, 79
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
Pharmacokinetics
biological activities of phthalocyanines XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
Photoablation
XeCl excimer laser coronary angioplasty: a convergence of favourable factors, 249
Photodynamic diagnosis
photodynamic diagnosis in respiratory tract malignancy using an excimer dye laser system, 189
Photodynamic effects
photoreactions of furocoumarins with biomolecules, 197
Photodynamic therapy
biological activities of phthalocyanines XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
clinical experience with the integral photodynamic therapy of bladder carcinoma, 183
endoscopic photodynamic therapy with haematoporphyrin derivative in gastroenterology, 157
in vitro and *in vivo* fluorescence monitoring of photosensitizers, 103
oesophageal cancer treated by photodynamic therapy alone or followed by radiation therapy, 167
photodynamic therapy in lung and gastrointestinal cancers, 175
photodynamic therapy in the treatment of malignant tumours: an analysis of 540 cases, 149
photodynamic therapy with endogenous protoporphyrin IX: basic principles and present clinical experience, 143
porphyrin sensitizers in tumour phototherapy. Novel sensitizers of the chlorin and bacteriochlorin class with amphiphilic properties, 29
studies on the photodynamic effect of haematoporphyrin derivative, 297
synthesis and *in vivo* activity of some porphyrindione derivatives with potential in photodynamic therapy, 133
time-gated fluorescence spectroscopy of porphyrin derivatives incorporated into cells, 39
use of photodynamic therapy in the treatment of vocal cord carcinoma, 291
Photofrin II
the composition of Photofrin II, 13
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111
Photoisomerization
the photophysics and photochemistry of the carotenoids, 359
Photomorphogenesis
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325
Photomotile responses
photomotile responses and ultrastructure of the euglenoid flagellate *Astasia fritschii*, 275
Photoreceptors
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325
Photosensitization
cellular uptake and photosensitizing properties of anticancer porphyrins in cell membranes and low and high density lipoproteins, 61
comparison of the photosensitizing efficiencies of haematoporphyrin (HP)

and its derivative (HPD) with that of free-base tetrasulphophthalocyanine (TSPC-H_2) in homogeneous and microheterogeneous media, 49
factors influencing the distribution pattern of porphyrins in cell membranes, 69
in vitro and *in vivo* fluorescence monitoring of photosensitizers, 103
Photosensitizers
biological activities of phthalocyanines XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111
Photosynthesis
the photophysics and photochemistry of the carotenoids, 359
Phototherapy
photothermal sensitizers: possible use in tumor therapy, 93
Photothermal sensitization
photothermal sensitizers: possible use in tumor therapy, 93
Phthalocyanines
biological activities of phthalocyanines XII: Synthesis, tumour uptake and biodistribution of ^{14}C-labelled disulphonated and trisulphonated gallium phthalocyanine in C3H mice, 121
porphyrin sensitizers in tumour phototherapy. Novel sensitizers of the chlorin and bacteriochlorin class with amphiphilic properties, 29
Phycomyces
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325
p*K*
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
Porphyrin derivatives
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
Porphyrin dimers
the composition of Photofrin II, 13
Porphyrindiones
synthesis and *in vivo* activity of some porphyrindione derivatives with potential in photodynamic therapy, 133
Porphyrins
factors influencing the distribution pattern of porphyrins in cell membranes, 69
in vitro and *in vivo* fluorescence monitoring of photosensitizers, 103
physical chemistry of porphyrins and their interactions with membranes: the importance of pH, 79
sites of protosensitization by protoporphyrin and tin protoporphyrin in leukemia L1210 cells, 87
Protein induction
patterns of protein synthesis in a growth delay mutant (nuv) of *Escherichia coli* after treatment by near-UV radiation or hydrogen peroxide, 283
Protoporphyrin IX
photodynamic therapy with endogenous protoporphyrin IX: basic principles and present clinical experience, 143
Protosensitization
sites of protosensitization by protoporphyrin and tin protoporphyrin in leukemia L1210 cells, 87
Psoralen
molecular mechanics and dynamics of DNA–furocoumarin complexes: effect of the aromatization of the pyrone ring on the intercalation geometry, 207
photocarcinogenicity of psoralens used in PUVA treatment: present status in mouse and man, 237
Pulsed photoexcitation
photothermal sensitizers: possible use in tumor therapy, 93
PUVA treatment
photocarcinogenicity of psoralens used in PUVA treatment: present status in mouse and man, 237

Repair
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221
Retinol
photomorphogenesis in behavioural and colour mutants of *Phycomyces*, 325

Spectra deconvolution
the presence of long-wavelength chlorophyll *a* spectral forms in the light-harvesting chlorphyll *a/b* protein complex II, 381
Spectroscopy
the composition of Photofrin II, 13
Spin trapping
comparison of the photosensitizing efficiencies of haematoporphyrin (HP) and its derivative (HPD) with that of free-base tetrasulphophthalocyanine (TSPC-H_2) in homogeneous and microheterogeneous media, 49
Spinach chloroplast
the presence of long-wavelength chlorophyll *a* spectral forms in the light-harvesting chlorophyll *a/b* protein complex II, 381
Squamous cell carcinoma
photodynamic therapy with endogenous protoporphyrin
IX: basic principles and present clinical experience, 143
Staphylococcus aureus
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
Streptococcus faecalis
the bactericidal activity of a deuteroporphyrin–hemin mixture on Gram-positive bacteria. A microbiological and spectroscopic study, 419
Structure
the composition of Photofrin II, 13
Superficial oesophageal cancer
oesophageal cancer treated by photodynamic therapy alone or followed by radiation therapy, 167

Tetrasulphophthalocyanine
comparison of the photosensitizing efficiencies of haematoporphyrin (HP) and its derivative (HPD) with that of free-base tetrasulphophthalocyanine (TSPC-H_2) in homogeneous and microheterogeneous media, 49
Time-gated fluorescence
time-gated fluorescence spectroscopy of porphyrin derivatives incorporated into cells, 39
Titration
the effect of tissue and cellular pH on the selective biodistribution of porphyrin-type photochemotherapeutic agents: a volumetric titration study, 309
Tumor localization
tissue-localizing properties of some photosensitizers studied by *in vivo* fluorescence imaging, 111
Tumour photosensitization
porphyrin sensitizers in tumour phototherapy. Novel sensitizers of the chlorin and bacteriochlorin class with amphiphilic properties, 29

Unicellular eukaryote
uptake and distribution of haematoporphyrin derivative in the unicellular eukaryote *Paramecium*, 405
UV light
specific mRNAs accumulate in long-wavelength UV-irradiated mouse epidermis, 431
UVA radiation
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221

Vocal cord carcinoma
use of photodynamic therapy in the treatment of vocal cord carcinoma, 291

Yeast
repair of furocoumarin-plus-UVA-induced damage and mutagenic consequences in eukaryotic cells, 221
